The status of a woman physician was discussed at the final session of the International Congress of Medicine, held in London, and attention called to the superior opportunities for women in the medical profession of America. One fact, however, has evidently escaped our colleagues of London and Berlin, that with the increase of these opportunities in the past 20 years the number of women attracted to the profession remains relatively the same, says the New York Times. There are no statistical data which show the actual number of woman practitioners in the United States; conclusions must be drawn from the census of the medical schools and the proportion of students, greater in the case of women than of men, who fall by the wayside after graduation, discounted from the number. These figures show if anything, a slight decrease within the past 10 years in the number of women studying medicine, a fact which is hardly to be reconciled with the opportunities afforded them for study at any of the medical institutions of the country on an equal footing with men students, and with such influences as the increased attention to children's diseases. On the other hand, taking up at random a report of the recent proceedings of the Royal Society of London, we note a woman physician's name prominent in the table of contents. Reflecting likewise at random, we can think of no woman physician in this country as noteworthy, for instance, as Dr. Maria Montessori, better known with us as an educator, but first recognized in her own country as an able psychiatrist.

ANNOUNCEMENT OF FRAMERS' WEEK.

From the preparations that have been made for Farmers' Week at the Ohio State University, February 2 to 6, 1914, it will probably be the biggest event of its kind ever held at the College of Agriculture. Every effort has been made by those in charge to give the farmers of the state the best instruction that the facilities of the college will afford. In addition to the important lectures by prominent agriculturists from Ohio and other states, several exhibitions and meetings of interest will be in progress during the week. The list will include meetings of the Ohio State Dairymen's Association, Ohio Plant Breeders, students' annual corn show, and probably the Ohio Live Stock Association. A new feature, which has been added this year for the first time, is the home-coming for all agricultural students and faculty.

DEAFNESS CANNOT BE CURED

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

Sold by Druggists, 75c.
Take Hall's Family Pills for constipation.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

IMPROVING TIMOTHY.

Five improved varieties of timothy have been received by the College of Agriculture from Cornell University, where an extensive experiment with selected varieties of timothy has been carried on for a number of years. The five varieties have given great promise in New York state and will be used by the college in their test plots, in an effort to find improved strains of timothy for Ohio. To most farmers all timothy seed looks alike, but the experiments at Cornell have shown that varieties can be secured which are particularly adapted to the production of hay and others to pasture. There is a big opportunity in Ohio to improve the hay crop by selection and breeding of timothy, and the college plans to give considerable attention to this line of work.

THIS IS OYSTER WEEK.

The oyster dealers throughout the country are endeavoring to popularize oysters by calling attention to their food value and cheapness as compared with meats and fowl. This week has been designated as oyster week by the wholesalers and the country is flooded with literature advertising the succulent bivalve.

Moore's Air-Tight Heater

Moore's Air-Tight Heater is the best house heating stove that was ever made—it will give absolute satisfaction and will burn any kind of coal.

It is built like a furnace—there is the bottom, the ashpit, firepot, dome and smoke elbows. All the parts are put together by means of cup joints packed with pure asbestos wicking; there is no putty or cement in any joint. Every joint is absolutely air-tight and remains so for all time.

RESOLUTION.

Declaring the necessity for the construction of lateral sewers in districts No. one (1) and two (2) in the Village of Perryburg, Ohio.

Be it resolved by the Council of the Village of Perryburg, Ohio, that it is necessary to construct two lateral sewers, one (1) in the alley between Indiana avenue and Fifth street, commencing east of the Fremont and Western Reserve Road, running thence east to the trunk sewer at Maple street and there terminating. One (2) in the alley between Indiana avenue and Fifth street, commencing west of the center alley between said streets, running thence west to a point east of the Findlay Road and there terminating.

Be it further resolved that said lateral sewers, be constructed in accordance with the plans and specifications now on file in the office of the Village Clerk, which plans and specifications are hereby approved.

Said sewers shall be constructed of vitrified sewer pipe and shall be paid for by special assessments to be levied upon all the lots and lands in said districts in proportion to the benefits which may result from said improvement, excepting the part which is apportioned to the Village which part shall be paid for out of the Service Fund. Bonds shall be issued in anticipation of the collection of special assessments, and said assessments shall be payable in two equal annual installments, the first installment to be paid with the taxes for the year, 1914.

The Clerk of Council is hereby directed to publish this resolution once each week for two consecutive weeks in the Perryburg Journal.

This resolution is declared to be an emergency measure and same shall take effect and be in force from and after its adoption and publication according to law.

Passed, October 14, 1913.
E. L. CLAY, Mayor.
JNO. W. LYONS, Clerk of Council.
